

All-in-one lighting and siren controls plus the power of connected fleet management

With bluePRINT Connect, take advantage of multiple features including geofencing, predictive maintenance, HAAS alert, collision prevention and data analytics.

This connectivity helps boost productivity, improve safety, allows for fleet optimization, provides seamless software integration and improves sustainability.

 **Geofencing**

With geofencing, users can receive notifications when a vehicle enters or leaves an area.

 **Predictive Maintenance**

Predictive maintenance allows the user to better plan and budget for fleet maintenance and needs.

 **Telematics**

Users will have access to live vehicle data, such as location, speed, fuel and more.

 **Reporting**

Users will be able to track and receive Fleet Maintenance Alerts, Vehicle Health Reports and Fuel Usage Reports.

 **HAAS Alert**

HAAS Alert provides approaching motorists with advanced warning through real-time digital alerts when emergency crews are nearby to help reduce accidents.

Vehicle	Driver	Black Triangles	Excessive Speed Out	Excessive Speed In
101	101	101	101	101
102	102	102	102	102
103	103	103	103	103
104	104	104	104	104
105	105	105	105	105
106	106	106	106	106
107	107	107	107	107
108	108	108	108	108
109	109	109	109	109
110	110	110	110	110

 **Driver Safety**

Keep track of driver safety trends and vehicle conditions with the ability to notify management of any concerns.

 **Data Analytics**

With actionable data analytics, users have access to Fleet Journey Reports, Operational Reports, as well as Multi-Vehicle Replay to help recreate a moment in time to see what was happening.

 **Flexible Data Ownership**

With bluePRINT Connect, users have access to flexible data ownership and retention plans.

SoundOff Signal is committed to innovation and with bluePRINT Connect, we are helping our customers improve fleet safety and reduce operational costs by providing access to powerful fleet analytics and communications when needed most.

Combining the expertise of SoundOff Signal and ACETECH, bluePRINT Connect bridges the gap between emergency lighting and controls with telematics and connectivity.

bluePRINT Connect uses a combination of cellular service, proprietary software, applications and GPS, which allows vehicles, equipment and other assets to connect to the cloud where it monitors and reports on nearly every detail of information about the vehicle.

Through easy integration to your bluePRINT Control System, bluePRINT Connect includes all necessary hardware to bring the vehicle online. Telematic and vehicle data is collected from the vehicle and sent to the cloud for remote viewing and reporting by fleet management.

With the ability to reduce preventable crashes by 80%, fuel consumption by 10% and maintenance expenses by 30%, this easy-to-install system improves safety and efficiency.

Reduce collisions
by **80%**

Reduce fuel consumption
by **10%**

Reduce maintenance
costs by **30%**
